I am a passionate and dedicated junior front-end web developer with a strong foundation in HTML, CSS, JavaScript & React. For backend side, have some particuler knowledge of Node, express js. Committed to creating visually appealing and user-friendly websites that deliver an exceptional user experience.

Skills

- Html / Css
- Bootstrap/Tailwind
- Core Javascript
- React

- Node / Express JS
- Next JS
- Creativity
- Time Management

My Projects

Melody Minds   Client Repo   Server Repo   Live Link

- This project is based on music learning school and there is user, instructor and admin have different workplace with all classes and payment system included. Its a e-commerce Project.
- Main Focus was in the design where i used tailwind css and framewrok was Daisy UI which is very user friendly. The design part is fully responsive and i am using React JS for best output. Node and stripe js also used for payment system.
- For authentication, here used firebase and for backend side data management, used MongoDB Atlas. Also used tanstack query, react icon and axios for simple code.

Toy garden   Client Repo   Server Repo   Live Link

- This project is based on for childrens who wants to buy a toy from best places. It is a e-commerce
- For user friendly design, here used Tailwind css and Daisy Ui framework
- For Authentication, here used firebase . Added Node js. This site stand on React Components for single page application. Also used react hook form and mongodb for crud operations.

Chefs Best Recipe   Client Repo   Server Repo   Live Link

- This project is based on some popular Bangladeshi chefs recipe.
- For design purpose, i used here React Bootstrap and basic Javascript.
- Firebase used for user login and register system, React icon used for some eye catchy design.

Language preference: React JS, Node js, Bootstrap, Tailwind, Daisy UI, MongoDB, NPM Packages
